SiLA Integration for Xavo Lab Logistics

SiLA compliant Incubator Driver

www.sila-standard.org

SiLA Incubator XLL Adapter

XLL Application
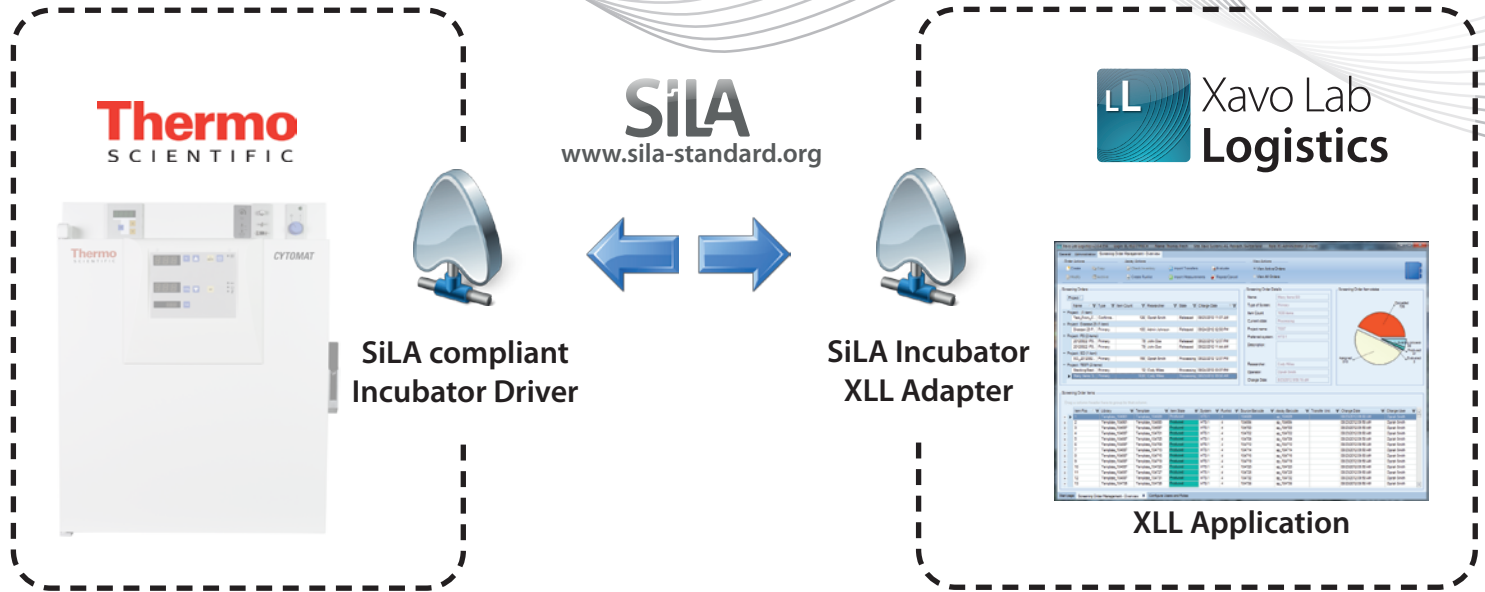

Xavo is one of the first companies to fully integrate SiLA incubator drivers in a software product. This enables the easiest possible integration for a software system with physical hardware and therefore reduces project costs.

But the users of the system get the greatest benefit: they now have one-click access to the complete inventory of any connected SiLA compliant storages.
